

## My SQL - Mini Project

# Johnson & Johnson Pharmacy

### *Project Questions*

1. Retrieve all columns for all records in the dataset.
2. How many unique countries are represented in the dataset?
3. Select the names of all the customers on the 'Retail' channel.
4. Find the total quantity sold for the 'Antibiotics' product class.
5. List all the distinct months present in the dataset.
6. Calculate the total sales for each year.
7. Find the customer with the highest sales value.
8. Get the names of all employees who are Sales Reps and are managed by 'James Goodwill'.
9. Retrieve the top 5 countries with the highest sales.
10. Calculate the average price of products in each sub-channel.
11. Retrieve all sales made by employees from 'Germany' in the year 2018.
12. Calculate the total sales for each product class, for each month, and order the results by year, month and product class.
13. Find the top 3 sales reps with the highest sales in 2019.
14. Calculate the monthly total sales for each sub-channel and then calculate the average monthly sales for each sub-channel over the years.
